CHEMICAL VAPOUR DEPOSITION OF METALS AND METAL SILICIDES

Chemical vapour deposition of metal silicides in silicon microelectronics
R. Madar and C. Bernard 1

Selective RTLPCVD of $TiSi_2$ without substrate consumption
A. Bouteville, C. Attuyt and J.C. Remy 11

Aspects of the selective deposition of $TiSi_2$ by LRP-CVD for use in ULSI submicron technology
J.L. Regolini, E. Mastromatteo, M. Gauneau, J. Mercier, D. Dutartre, G. Bomchil, C. Bernard, R. Madar and D. Bensahel 18

Chemical vapour deposition of tungsten by H_2 reduction of WCl_6
J.A.M. Ammerlaan, D.R.M. Boogaard, P.J. van der Put and J. Schoonman 24

The WF_6–Si reaction studied in situ by time-resolved mass spectrometry
P.A.C. Groenen, J.G.A. Hölscher and H.H. Brongersma 30

Influence of standard processing on area-selective chemical vapour deposition of tungsten on tantalum disilicide
Th. Eriksson, J.-T. Wang, J.-O. Carlsson, J. Keinonen, M. Östling and C.S. Petersson 35

Investigation of tungsten CVD on Mo and TiN
T. Gessner, B. Hintze, T. Raschke and S.E. Schulz 41

The growth of ultra-thin amorphous WGe_x films on Si by the GeH_4 reduction of WF_6
G.J. Leusink, T.G.M. Oosterlaken, C.A. van der Jeugd, G.C.A.M. Janssen and S. Radelaar 47

Tungsten plug formation by an optimized tungsten etch back process in non-fully planarized topology
K. Koller, H.P. Erb and H. Körner 54

Metallurgy of a two-step approach for CVD-W contacts studied by TEM
A. Mitwalsky, H. Körner and V. Huber 62

Adhesion of LPCVD WSi_x/W bilayers on oxide films
Ph. Lami, Ph. Normandon and J.C. Oberlin 69

THIN FILM REACTIONS

Reactive diffusion in thin films
J. Philibert 74

Effects of impurities on the interface of ion beam sputtered tungsten with silicon
F. Meyer, D. Bouchier, A. Benhocine and G. Gautherin 82

Morphological instabilities of nickel and cobalt silicides on silicon
S. Nygren, D. Caffin, M. Östling and F.M. d'Heurle 87

The formation of epitaxial $CoSi_2$ thin films on (001) Si from amorphous Co–W alloys
A.H. Reader, J.P.W.B. Duchateau, J.E. Crombeen, E.P. Naburgh and M.A.J. Somers 92

Understanding solid phase interactions: the use of tracer isotopes
S.-L. Zhang, F.M. d'Heurle and P. Gas 103

Reaction of niobium with diamond films
C.R. Guarnieri, F.M. d'Heurle, J.J. Cuomo and S.J. Whitehair 115

Calorimetric and microstructural study of nickel–silicon thin-film reactions
P. Knauth, A. Charaï, D. Roux, P. Gas and C. Bergman 120

Chromium germanides: formation, structure and properties
N. Lundberg, M. Östling and F.M. d'Heurle 126

Grain boundary composition of pure and boron-doped cobalt disilicide
A. Malchère, P. Gas, C. Haut, A. Larere, T.T. Nguyen and S. Poize 132

The reaction of scandium thin films with silicon: diffusion, nucleation, resistivities
O. Thomas, C.S. Petersson and F.M. d'Heurle 138

Boron redistribution during formation of nickel silicides
C. Zaring, H. Jiang, B.G. Svensson and M. Östling 147

Formation of iron disilicide on amorphous silicon
U. Erlesand, M. Östling and K. Bodén 153

Application of dynamic ion mixing in platinum silicide formation
S. Tamulevičius, L. Pranevičius and J. Budinavičius 159

DIFFUSION IN SILICIDES

Diffusion of dopants in tungsten disilicide: effects of diffusion paths
O. Thomas, G. Scilla, P. Gas, J. Cotte, R.V. Joshi, M. Bakli, G. Göltz and F.M. d'Heurle 165

Boron outdiffusion from poly- and monocrystalline $CoSi_2$
W. Eichhammer, K. Maex, K. Elst and W. Vandervorst 171

Cobalt lattice diffusion in bulk cobalt disilicide
T. Barge, S. Poize, J. Bernardini and P. Gas 180

Diffusion of boron and arsenic in molybdenum disilicide films
S. Solmi, R. Angelucci, G. Cicognani and R. Canteri 186

Titanium silicide as a diffusion source for phosphorus: precipitation and activation
V. Privitera, F. La Via, C. Spinella, V. Raineri and E. Rimini 190

PHYSICAL PROPERTIES

Epitaxial silicides with the fluorite structure
H. von Känel, R. Stalder, H. Sirringhaus, N. Onda and J. Henz 196

A comparison of Ti films sputtered in an N_2/Ar plasma at 25 and 500°C
J.A. Fair and M. Delfino 206

Formation of titanium disilicide during rapid thermal annealing, observed by in-situ stress measurements
J.F. Jongste, G.C.A.M. Janssen and S. Radelaar 212

Rapid thermal annealing of WSi_x. In-situ resistance measurements
C. Nobili, M. Bosi, G. Ottaviani, G. Queirolo and L. Bacci 219

Point defect generation during silicide formation
U. Erlesand, M. Östling, B.G. Svensson and P. Gas 224

Optical and electronic properties of 5th-column transition metal disilicides
M. Amiotti, A. Borghesi, F. Marabelli, A. Piaggi, G. Guizzetti and F. Nava 230

Schottky barriers of scandium and scandium monosilicide on silicon
F.M. d'Heurle, M.O. Aboelfotoh, F. Pesavento and C.S. Petersson 237

Low temperature specific heat of $CoSi_2$
A. Briggs, O. Thomas, R. Madar and J.P. Senateur 240

Ion beam characterization of plasma oxide grown on $TiSi_x$ ($x > 2$)
A. Climent-Font, J. Perrière, R. Pérez-Casero, J.P. Enard and B. Lavernhe 243

Some transport properties of single crystals of Group Va transition metal disilicides
U. Gottlieb, O. Laborde, O. Thomas, A. Rouault, J.P. Senateur and R. Madar 247

Plasma oxidation of $TaSi_x$ thin films
R. Gómez-San Román, R. Pérez-Casero, J.P. Enard, J. Perrière and J.M. Martínez-Duart 254

Epitaxial recrystallization of ion-implanted $CoSi_2$
M.C. Ridgway, R.G. Elliman and J.S. Williams 260

ION BEAM PROCESSING

Formation of buried $CoSi_2$ layers with ion beam synthesis at low implantation energies
R. Jebasinski, S. Mantl, L. Vescan and Ch. Dieker 264

Formation of ultra-thin buried $CoSi_2$ layers by ion implantation in (100) Si
K. Maex, J. Vanhellemont, S. Petersson and A. Lauwers 273

Structural properties of thin silicide layers formed by high-dose metal implantation
A. Vantomme, M.F. Wu, G. Langouche, H. Vanderstraeten and Y. Bruynseraede 278

Formation of rhodium silicide by rapid thermal annealing and by ion beam mixing
E.P. Burte and G. Neuner 283

DEVICE AND PROCESS APPLICATIONS OF REFRACTORY METALS AND SILICIDES

Incorporation of metal silicides and refractory metals in VLSI technology
C.M. Osburn, Q.F. Wang, M. Kellam, C. Canovai, P.L. Smith, G.E. McGuire, Z.G. Xiao and G.A. Rozgonyi 291

Formation and contact properties of titanium-silicided shallow junctions
C. Dehm, J. Gyulai and H. Ryssel 313

Control of lateral overgrowth of $TiSi_2$ and $CoSi_2$ films in VLSI circuits
L.P. Hobbs and K. Maex 321

Materials aspects of silicides for advanced technologies
K. Maex 328

Characterization of a self-aligned RTP titanium disilicide MOS process: titanium–silicon dioxide interaction
W. Kaplan, S.-L. Zhang, H. Norström, M. Östling and A. Lindberg 338

Feasibility study of electroless copper deposition for VLSI
R. Palmans and K. Maex 345

WN_x films prepared by reactive ion-beam sputter deposition
A. Bosseboeuf, A. Fourrier, F. Meyer, A. Benhocine and G. Gautherin 353

Tungsten: sputter deposition and plasma etching
S. Franssila 358

Performance of $W_{100-x}N_x$ diffusion barriers between ⟨Si⟩ and Cu
P.J. Pokela, C.-K. Kwok, E. Kolawa, S. Raud and M.-A. Nicolet 364

Amorphous Ta–Si–N diffusion barriers in Si/Al and Si/Cu metallizations
E. Kolawa, P.J. Pokela, J.S. Reid, J.S. Chen and M.-A. Nicolet 373

Rapid thermal processing reliability of titanium silicide implanted with arsenic, boron and phosphorus
F. La Via, V. Privitera and E. Rimini 377

Tungsten silicide formation from sequentially sputtered tungsten and silicon films
J.M. Molarius, S. Franssila, G. Drozdy and J. Saarilahti 383

Study of the diffusion path during the lateral growth in the Salicide process
M. Bakli, G. Göltz, S. Caranhac and G. Bomchil 391

Author index 396

Subject index 400
